Advantages

- First time in India HIT developed MDBR (Multi Domes Bio-Gas Reactor) technology.
- It's a unique design comprising of Multi Domes, Multi Chambers Multi Inlets & Outlets with expandable option Bio-Gas Reactor.
- Square type
- 100 Cum to any Capacity
- Multi FRP Domes with upward and downward movements in the water seal.
- Specialized bricks used for the construction of Baffled walls / Internal walls in the digester for the enhancement of surface area and increasing the density of the microbial population.
- Bottom Mixing by using Pump
- Primary Digester Technology was introduced for Aerobic hydrolysis of Raw material.
- 20 days (HRT (Hydraulic Retention Time))
- 80 % (SRT (Solid Retention Time))
- 10-12% (Solids loading rate)
- Pressure relief valves are not required due to floating Domes.
- Gas storage increases up to 10% due to floating dome.
- MDBR is a proprietary item of HIT-Patent Applied .

Client Review

Nastia Nikolskaya

United Kingdom

The responsiveness to intricate details and delivering within an unexpected timeframe truly impressed me. As the project complexities grew, with endless specifications, the final result exceeded my expectations. Thank you for your invaluable assistance! I'm extremely pleased with my website :)

MelSoft

Australia

I take pleasure in recommending adbrill to others. The services provided were valuable, and the customer service attitude and cooperation are truly impressive. Despite being a low-budget project.

Katrum Gill

Australia

Met all requirements, completed in one day, excellent customer support. Thank you!

Dani Arnaout

Lebanon

Adbrill .NET development team is highly skilled. I'll hire them for my next project. The project was delivered before the deadline, and the quality was exceptional.
